

Csc510, Project2

1. Write report a markdown readme file in Github.
2. Fill out and print this rubric. Hand in class.

Date:

Project Id (column1 of <http://goo.gl/gmoYrk>):

Project Name (column2 of <http://goo.gl/gmoYrk>):

Member	Last name	First name	github id	email
1	Luo	Mark	macluo	tluo@ncsu.edu
2	Neal	Matthew	meneal	meneal@ncsu.edu
3	Spencer	Kurt	ktspence	ktspence@ncsu.edu
4	Morrow	William	duh102	wemorrow@ncsu.edu

In the following, column 0 is your score column 1 will come from the tutor

0	1	Score	What
1	1		From http://goo.gl/gmoYrk , there is a link to the report readme.
1	1		Has section "1.Collection" describing collection tricks
1	1		Has section "2.Anonymization" describing anonymization tricks
1	1		Has section "3.Tables" describing tricks for making your tables
1	1		Has section "Data" describing how much data was collected
1	1		Has section "Data samples" : snippets of collected data, and Github links to the real stuff
1	3		Has section "Feature detection": 10-20 detectors, described, plus links to code
1	2		Has section "Feature detection results": what found when feature detectors applied
1	3		Has section "Bad smells detector": scripts used, described, plus links to code
1	2		Has section "Bad smells results": what found when the bad smell detector was applied
1	2		Has section "Early warning": scripts used, described, plus links to code
1	4		Has section "Early warning results": what found when the early warning detector was applied

Final score: $\text{round}(\text{score} \times \text{ticks} / 1.5)$; so max = 15 (out of 10)
